Browser Settings for Internet 7...

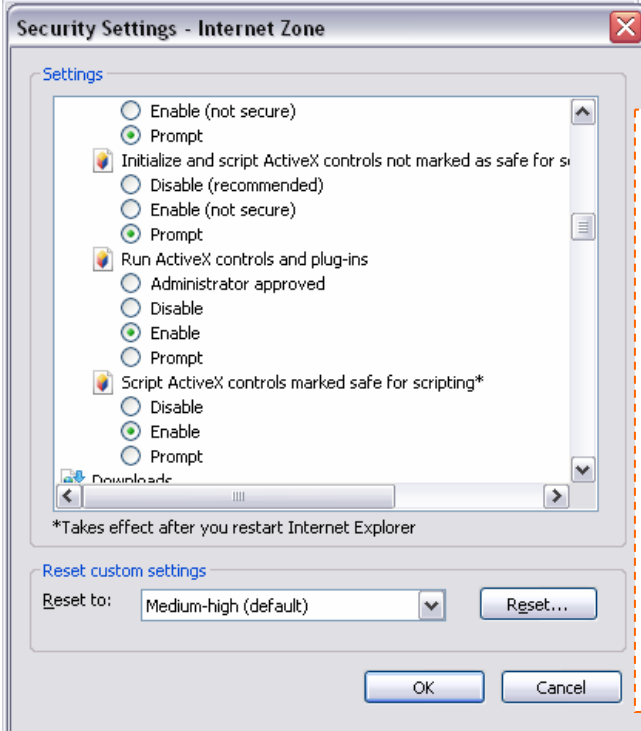

The screenshot shows the Windows Internet Explorer browser window. The title bar reads "Blank Page - Windows Internet Explorer". The address bar contains "about:blank" and the search bar contains "Yahoo! Search". The menu bar includes "File", "Edit", "View", "Favorites", "Tools", and "Help". The "Tools" menu is open, displaying the following options: "Delete Browsing History...", "Pop-up Blocker", "Phishing Filter", "Manage Add-ons", "Subscribe to this Feed...", "Feed Discovery", "Windows Update", "Windows Messenger", "iResearchPanel", "WinAVI FLV Manager", and "Internet Options". A yellow callout bubble with a black border points to the "Internet Options" menu item. The text inside the bubble reads: "Open Internet Explorer and click on 'Tools' -> 'Internet Options'." The Windows taskbar is visible at the bottom, showing the Start button and several open applications including "Kapil...", "to do...", "Repo...", "N cod...", "Inter...", "Prese...", and "Blank...". The system tray shows the time as "11:23 AM" and the zoom level as "100%".

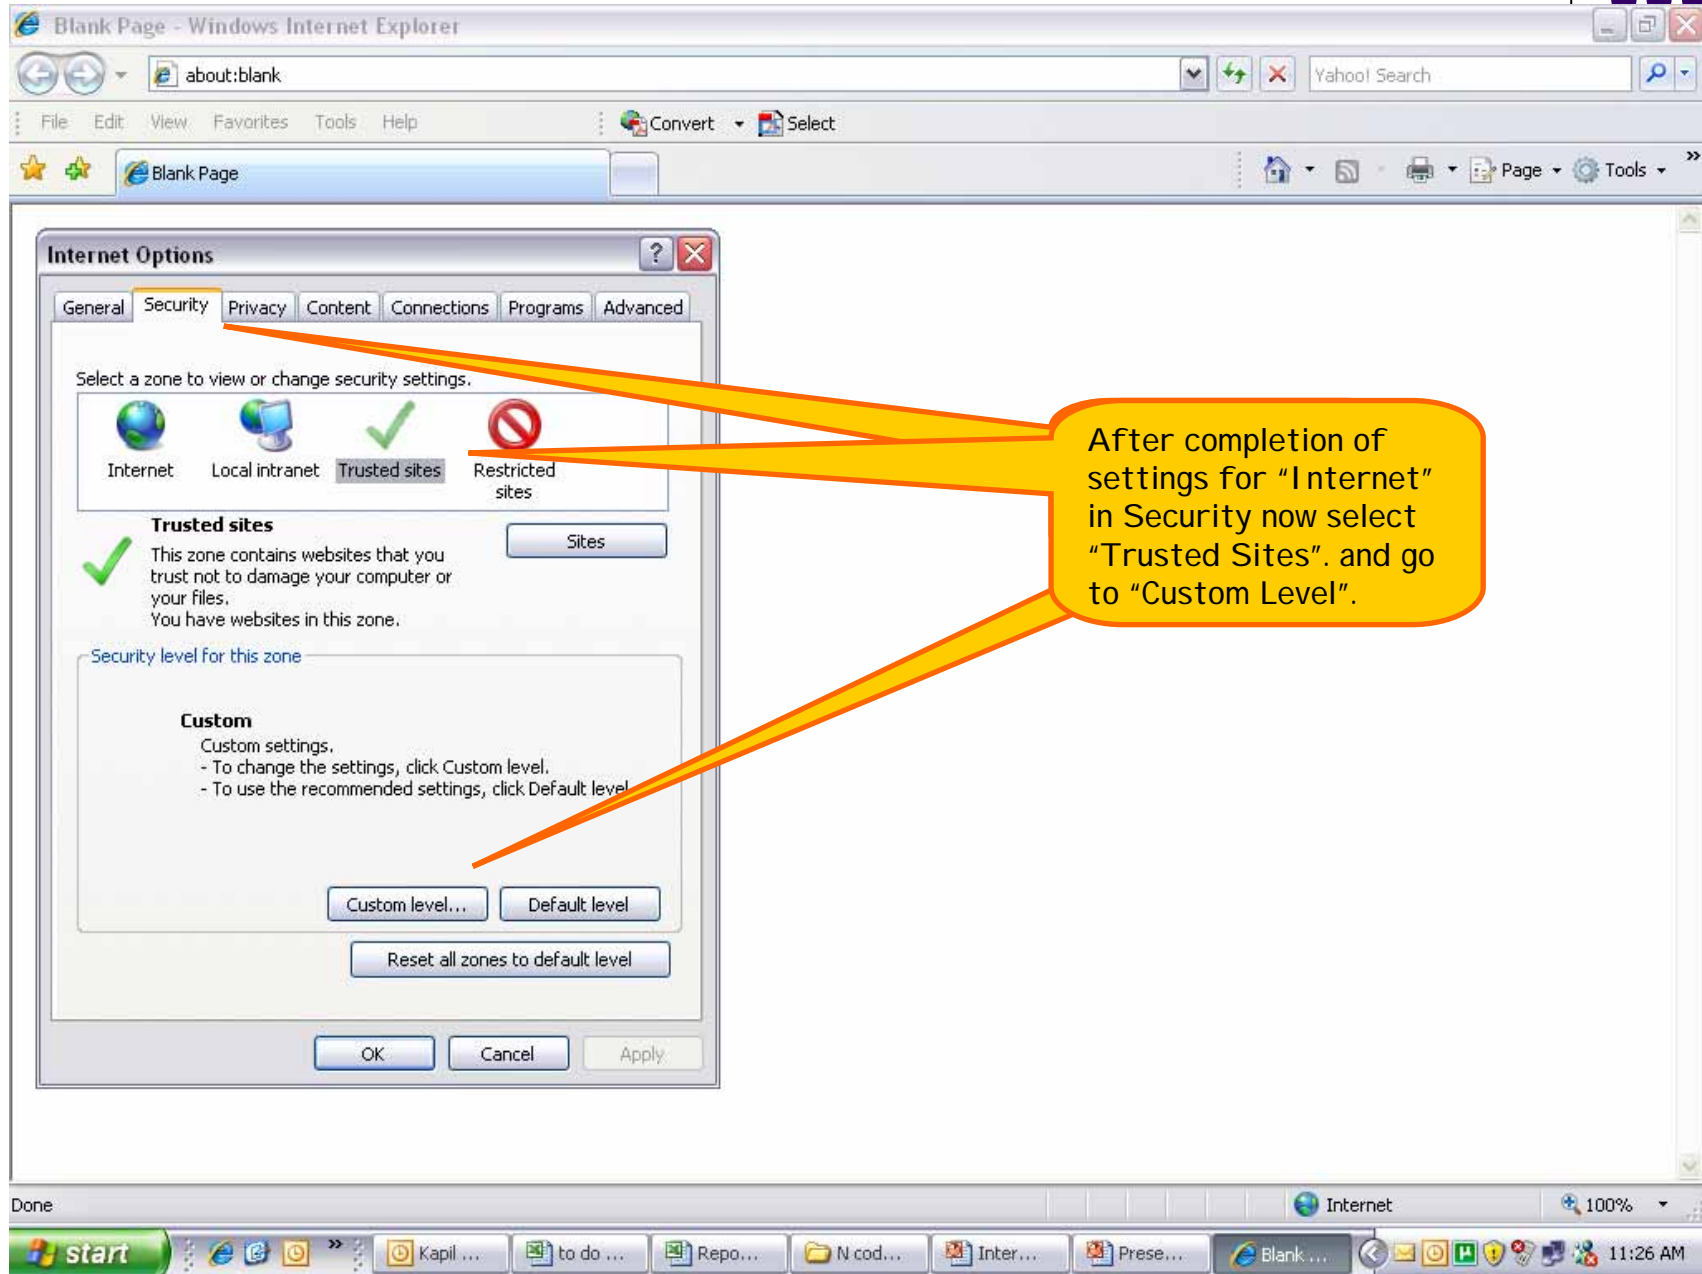

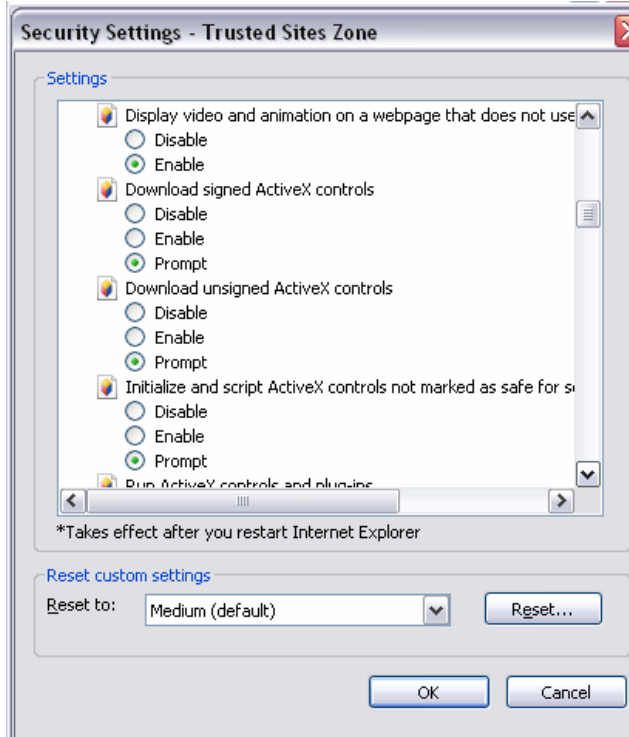

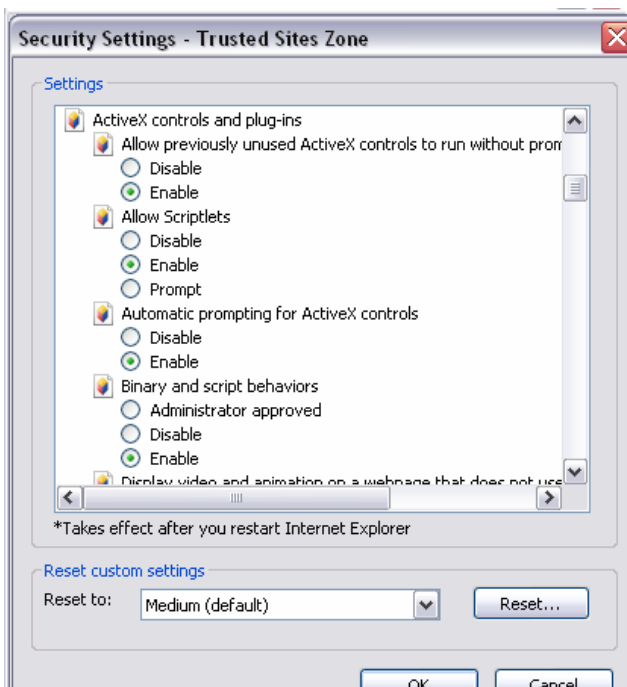

- As you click on the “Custom Level” many options will be displayed, some of which are to be set.
- Among all options only “Activex controls and plug-ins” has to set which can be seen in given three images and mention below details.
- After selecting all the options of Activex controls & plug-ins, select “Medium” in reset custom level, click on “OK and then YES”.

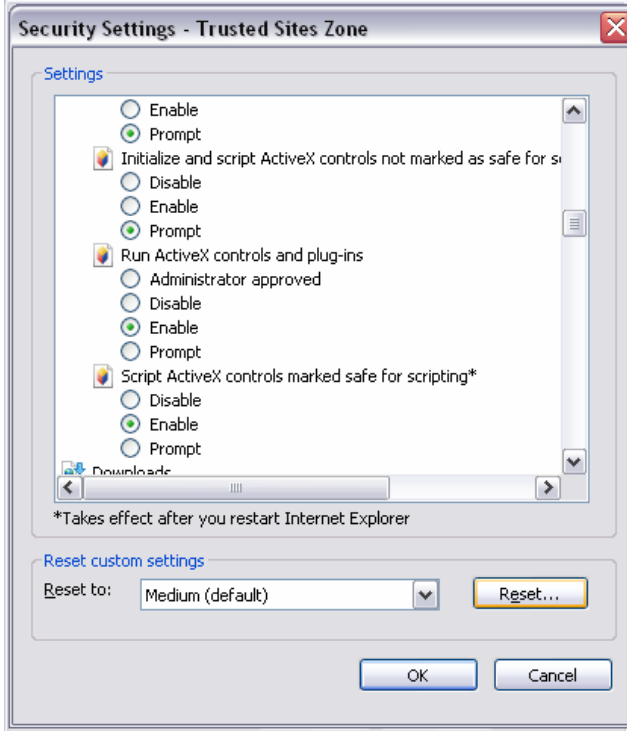

1. Allow previously unused Activex controls to run without prompt – **Enable**
2. Allow Scriptlets – **Enable**
3. Automatic prompting for Activex controls – **Enable**
4. Binary and script behaviors – **Enable**
5. Display video and animation on a webpage that does not use external media player – **Enable**
6. Download signed Activex controls – **Prompt**
7. Download unsigned Activex controls – **Prompt**
8. Initialize and script Activex controls not marked as safe for scripting – **Prompt**
9. Run Activex controls and plug-ins – **Enable**
10. Script Activex controls marked safe for scripting* - **Enable**

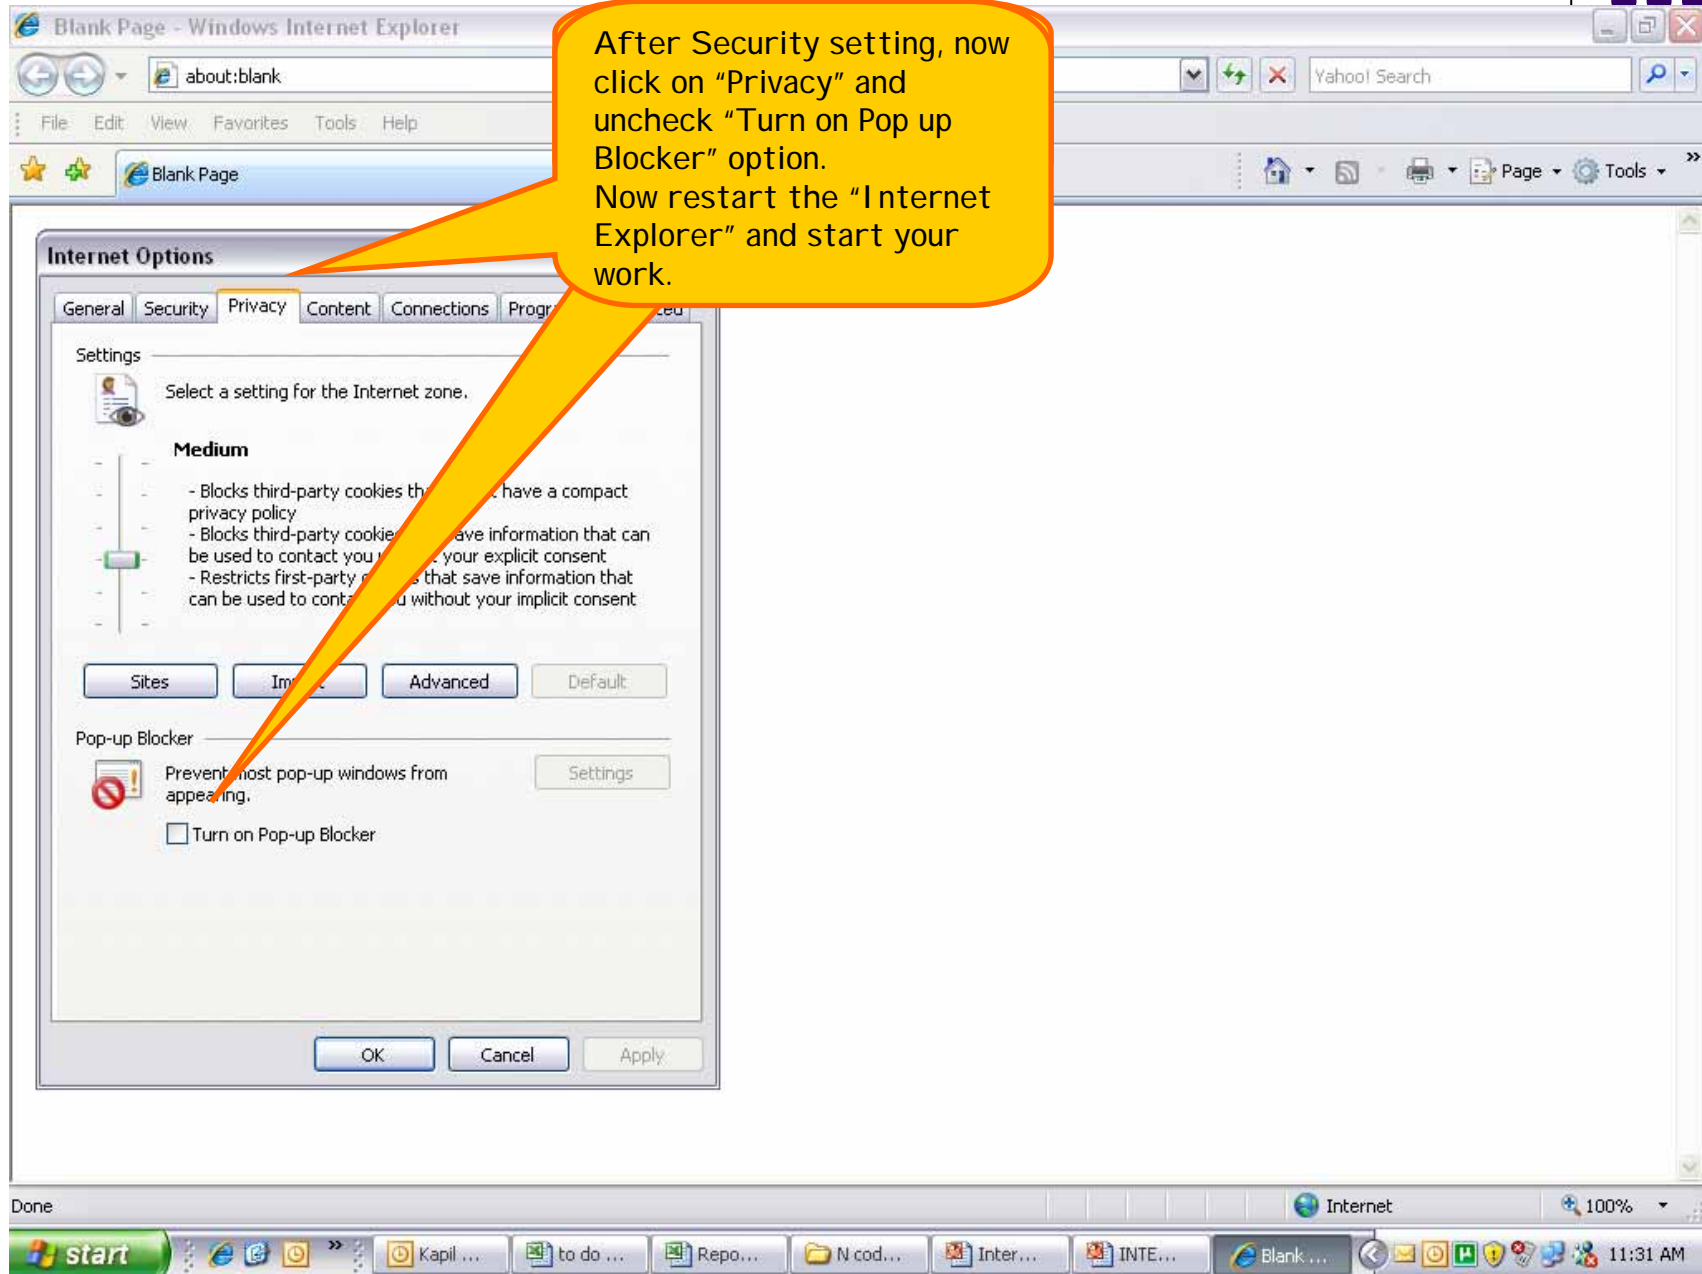

After completion of settings for "Internet" in Security now select "Trusted Sites". and go to "Custom Level".

- As you click on the “Custom Level” many options will be displayed, some of which are to be set.
- Among all options only “Activex controls and plug-ins” has to set which can be seen in given three images and mention below details.
- After selecting all the options of Activex controls & plug-ins, select “Medium” in reset custom level, click on “OK and then YES”.

1. Allow previously unused Activex controls to run without prompt – **Enable**
2. Allow Scriptlets – **Enable**
3. Automatic prompting for Activex controls – **Enable**
4. Binary and script behaviors – **Enable**
5. Display video and animation on a webpage that does not use external media player – **Enable**
6. Download signed Activex controls – **Prompt**
7. Download unsigned Activex controls – **Prompt**
8. Initialize and script Activex controls not marked as safe for scripting – **Prompt**
9. Run Activex controls and plug-ins – **Enable**
10. Script Activex controls marked safe for scripting* - **Enable**

After Security setting, now click on "Privacy" and uncheck "Turn on Pop up Blocker" option. Now restart the "Internet Explorer" and start your work.
